LIC appeals against GST demand of ₹104.90 crore

Mumbai: LIC said it has filed an appeal before the GST Appellate Authority, Tamil Nadu, against an order demanding GST of ₹104.90 crore for FY 2019-20. The order was issued by Joint Commissioner, Chennai. In addition to GST, LIC has been asked to pay an interest of ₹45.53 lakh and a penalty of ₹11.03 crore. **OUR BUREAU**

Labour Ministry may allow EPS contribution hike

New Delhi: The Labour Ministry is considering to revamp Employees' Pension Scheme, 1995, by allowing more contribution by members for higher pension and retirement benefit, sources said. Currently, the entire contribution of EPFO members, or 12 per cent of the basic salary, goes into the EPF account. It is the employers' contribution, of which 8.33 per cent goes into EPS-95 while the remaining 3.67 per cent is credited into the EPF account. **IN**

'Tata Technologies cuts product development timelines by 20%

KEY REASONS. Competition and demand for upgrades behind trend, says EVP Saraph

Aishwarya Kumar
Bengaluru

Tata Technologies, a subsidiary of Tata Motors, is leveraging its domain expertise and proprietary digital tools to reduce product development timelines by 10 to 20 per cent, said Shailesh Saraph, EVP and Global Head of ER&D Delivery, Tata Technologies.

These tools, which include real-time analytics, automated reporting, digital twins and simultaneous engineering, enable clients to anticipate potential challenges, streamline homologation processes, accelerate product development and ensure compliance with safety standards.

REASONS FOR TREND
In addition to improving timelines, these tools will also enable cutting costs for

EVs are no longer just vehicles; they are software platforms with integrated electronic feature.

SHAILESH SARAPH
EVP and Global Head of ER&D Delivery, Tata Technologies

OEMs by 5 to 10 per cent, he added.

Further, Saraph said that intense competition in the EV sector is the key reason behind the growing trend of manufacturers reducing timelines between launches. "Shorter design timelines are primarily driven by competition, as every manufacturer aims to deliver faster. Moreover, EVs are no longer just vehicles; they are software platforms with integrated electronic features," he

stated. Saraph explained that this trend is also driven by the growing consumer demand for vehicles with frequent upgrades, new features, and advanced software capabilities. "One key reason why automotive OEMs aim to release a new car or variant every six months to a year is to meet this demand," he said. "Once you capture the imagination of your consumers and provide an experience that aligns with

their lifestyle, they are more likely to remain loyal to the same manufacturer."

REDUCED TIMELINES
To support these changing market demands, Tata Technologies, which generates 70 per cent of its revenue from the automotive sector, has reduced its EV program delivery timelines to 25 months, significantly faster than the traditional 36-month timeframe, Saraph told *businessline*.

The company reported a 2 per cent decline in consolidated net profit for the quarter ending September 30, at ₹157 crore from ₹160 crore in the corresponding quarter last year. Revenue from operations stood at ₹1,296 crore, marking a 2 per cent increase compared to ₹1,269 crore in the corresponding period. Its shares closed at ₹933.50 on the BSE, down by 0.73 per cent.

With bulk of sanctions, DRDO's tech fund boosts MSMEs, start-ups

G Balachandrar
Chennai

The Defence Research and Development Organisation (DRDO)'s Technology Development Fund (TDF) scheme, which is part of the 'Make in India' initiative, has sanctioned a total of 78 projects valued at ₹333.21 crore so far. A significant portion of this funding has been directed towards MSMEs and start-ups, according to a senior DRDO official.

The TDF scheme is designed to support the development of innovative defence technologies. Under the scheme, MSMEs and start-ups can submit project proposals; if selected, they can receive funding from DRDO.

"Initially, the funding cap was ₹10 crore, but following consultations with MSMEs and feedback from the Raksha Mantri, the funding limit has been raised to ₹50 crore, said Manish Pratap Singh, Director, DYSL-CT, DRDO

Young Scientist Laboratory, Chennai. He was speaking at a session on the "Role of MSMEs in Defence Manufacturing" at EPC India's IESS XII event.

KEY FEATURE
A key feature of the TDF scheme is that DRDO will cover 90 per cent of the project cost, with the remaining funding to be provided by the industry partner.

Singh explained the approval process for the TDF scheme, highlighting that it is highly transparent. The evaluation committee, including the Chairman, adopts an open-minded ap-

proach. "We do not focus on bureaucratic formalities; instead, our primary focus is on the innovation of the technology and how well it aligns with defence needs," he added.

DARE TO DREAM
Singh also highlighted DRDO's Dare to Dream, an initiative that invites individuals and small companies to submit innovative solutions for existing defence challenges. Winners can receive additional funding to develop their ideas into prototypes through the TDF. "There is no application fee, and the winners receive cash prizes (₹10 lakh for first place, ₹6 lakh for second, and ₹5 lakh for third)," he added. Singh also spoke about two government programmes—IDX (Innovative Defence Excellence) and Aditi—which have a combined budgetary support of ₹750 crore between FY24 and FY26, aimed at encouraging MSMEs to take advantage of emerging opportunities.

Stellaris Venture Partners closes its third \$300-m fund

Our Bureau
Bengaluru

Venture capital firm Stellaris Venture Partners, an early backer of Mamaearth and Whatfix, has closed its third \$300-million fund.

In continuation of its early-stage tech investment strategy, the firm will invest in 25-30 start-ups over the next three years.

Rahul Chowdhri, Partner at Stellaris Venture Partners said, "India's start-up ecosystem has transformed since we started our fund with a 4x growth in deal flow and a rise in repeat entrepreneurs and founders from successful start-ups. With this new fund, we're excited to back founders using technology to solve deep problems in large markets." "Our team, consisting of former entrepreneurs and business builders, brings deep expertise and global networks in key sectors, such as consumer tech, AI, SaaS and financial services, to support our portfolio companies throughout their journey."

As part of the new fund launch, Stellaris has an-

nounced key leadership appointments. Naman Lahoty, a repeat entrepreneur and previously a Principal with the firm, has been appointed as Partner. He joined Stellaris in 2019 to focus on consumer investments, and has invested in AI webcomic start-up Dashtoon and D2C consumer brand Zouk, among others.

Chetan GMS, previously SVP Finance, will now be the firm's CFO, while Preseedha Premnath has been appointed as General Counsel. Additionally, Yardhan Dharmidharka, an AI/ML engineering leader previously based in New York, has joined as an Investment Principal.

FUNDING ROUNDS
Since its inception in 2017, Stellaris has backed 44 tech start-ups across two funds, 60 per cent of which were investment-stage businesses.

The firm participates as a lead investor in seed and series A rounds of start-ups, and continues to support its portfolio companies.

The firm is an early investor in consumer brand Mamaearth, and in Whatfix, a digital adoption platform that raised \$125-million.

RIL buys 21% stake in US-based helium producer

Our Bureau
Mumbai

Reliance Finance and Investments USA LLC, a step-down wholly owned subsidiary of Reliance Industries, has bought 21 per cent stake in Wavetech Helium, Inc for \$12 million.

WHI is a US-based helium gas exploration and production company, incorporated on July 2, 2021. It is engaged in the acquisition, exploration and development of properties to produce helium from underground reservoirs. It is used in medical applications and scientific research and given the growth expected in AI & datacentres, helium demand for semiconductor manufacturing is expected to rise.

"The acquisition is part of the company's strategy to expand its exploration and production business in low carbon solutions. The investment is not a related party transaction and none of the company's promoter/promoter group/other group companies have any interest in the above transaction," RIL said.

India needs testing facilities for energy storage systems: NITI Aayog member

Press Trust of India
New Delhi

India must establish nationally accredited testing facilities for battery energy storage systems to support its ambitious clean energy transition goal, suggested NITI Aayog member VK Saraswat on Thursday.

According to a statement, speaking at FICCI's Energy Storage Conference 2024, he highlighted the significant gap in testing and certification infrastructure as India aims to deploy over 238 gigawatt hours of battery storage capacity by 2030 to balance its expanding renewable energy network.

He called for authorising third-party testing and certification till the time the government sets up storage certification agencies. Saraswat underlined that India requires a universal standard for all types of energy storage systems.

While the Bureau of Indian Standards has developed 17 specifications for energy storage systems, with more under development, he pointed out, the country

VK Saraswat, NITI Aayog member

lacks adequate facilities to verify compliance with these standards.

GOALS PRESENCE
He also underscored that coal will have a substantial presence in India's energy mix despite aggressive renewable energy targets, with a projected capacity of 150 gigawatts in 2047, down from the current level of 218 gigawatts.

At the same time, solar capacity is expected to expand substantially by 2047, requiring extensive storage integration. Saraswat outlined various storage technologies under consideration, including pumped hydro which has identified the potential of

100 gigawatt capacities across 60 sites.

Flow batteries, sodium-sulphur systems, and emerging technologies like aluminium-air batteries are being evaluated alongside conventional lithium-ion solutions, he said.

EXPLORING PATHWAYS
The government is exploring multiple pathways to address these challenges, including promoting domestic manufacturing of critical components and developing technology-agnostic standards.

Nuclear power, including small modular reactors, is considered a long-term solution for hard-to-abate sectors currently reliant on coal-based power.

BEML secures order worth ₹3,658 crore from CMRL

Our Bureau
Chennai

BEML Ltd, a distinguished mini ratna public sector enterprise under the Ministry of Defence, has won an order worth ₹3,658 crore from Chennai Metro Rail Ltd (CMRL).

It has been awarded a contract worth approximately ₹3,658 crore, involving the design, manufacture, supply, testing, commissioning and training for Standard Gauge Metro Rolling Stock (Electrical Multiple Units) and Depot Machinery & Plant, along with a 15-year comprehensive maintenance contract.

Under the project, BEML will deliver 210 metro cars configured into 70 three-car

trainsets (DMC + TC + DMC), which will primarily operate in Unattended Train Operation (UTO) mode (GoA4), the most-advanced level of automation for metro systems, says a release.

THREE CORRIDORS
The metro trains will serve three key corridors in Chennai — Corridor 3: Madhavaram to Sipcot (45.8 km); Corridor 4: Lighthouse to Poonamallee (26.1 km) and Corridor 5: Madhavaram to Sholinganagar (47 km).

The total network spans 118.9 km, including 76.3 km of elevated tracks and 42.6 km underground. The first trainset is scheduled for delivery in January 2027, with the final trainset expected by April 2029.

Indiagold plans to apply for NBFC licence in FY25

Piyush Shukla
Mumbai

Indiagold, a gold loan originating business correspondent company, plans to apply for a non-banking finance company (NBFC) licence in FY25, co-founder Deepak Abbot told *businessline*.

Abbot, a former Paytm executive, says Indiagold originates gold loans for three banks from eight cities and has a staff strength of 264. The company aims to originate ₹7,000 crore of gold loans in FY26 and FY27 each, add four-five new cities each year, and raise staff strength to 400 by FY25-end and hire another 300 employees in the next fiscal.

After receiving the NBFC

Deepak Abbot, Co-founder, Indiagold

licence, Abbot says the existing partnerships with three banks will continue, and the licence will make lenders more comfortable in partnering with it gold loans.

BUSINESS MODEL
The NBFC licence will also enable the company to cre-

ate more customised products. According to Abbot, gold loan customers can book appointment for a home visit on Indiagold's on-line platforms. The BC is further targeting to partner with banks which have lesser branches or don't offer gold loans from every branch.

RBI SCRUTINY
The RBI on September 30 issued a notification saying few lenders who partnered with fintechs or business correspondents BCs for gold loans adopted irregular practices like carrying out valuation of gold in the absence of customer, doing credit appraisal and valuation by the BC itself, storing gold in the custody of BC and using internal accounts for disburse-

ment as well as repayment of loans, among others.

Abbot says at Indiagold, 100 per cent of gold valuation is done in front of customers. Further, a loan cannot proceed unless bank's approval is received. "The regulator during its annual audit has contracted independent gold valuers to check the valuation of Indiagold assayed gold and cleared our valuation standards," Abbot said.
