If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Material Accounting Policy

1.1 Basis of Preparation of Financial Statements

The financial statements which comprise the Balance Sheet, the Statement of Profit and Loss, the Cash Flow Statement, and the Statement of Changes in Equity ("financial statements") have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Section 133 of the Companies Act, 2013 ("the Act"), Companies (Indian Accounting Standards) Rules, 2015, along with relevant amendment rules issued thereafter and other relevant provisions of the Act, as applicable.

(i) Basis of measurement

The financial statements have been prepared on a historical cost basis on the accrual basis of accounting.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Rounding off amounts

All amounts disclosed in financial statements and notes have been rounded off to the nearest lakhs as per requirement of Schedule III of the Act, unless otherwise stated.

Use of estimates and judgement

In the preparation of financial statements, the management makes estimates and assumptions in conformity with the Generally Accepted Accounting Principles in India. Such estimates and assumptions are made on reasonable and prudent basis taking into account all available information. However, actual results could differ from these estimates and assumptions and such differences are recognised in the period in which results are ascertained. The estimates and underlying assumptions are reviewed on an on-going basis.

1.2 Classification between Current and Non-current

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current - noncurrent classification of assets and liabilities.

1.3 Property, Plant & Equipment

Property, plant and equipment are stated at cost of acquisition less accumulated depreciation and impairment if any. Freehold land is carried at historical cost. The Company is adopting the cost model for determining gross carrying amount. Cost comprises of purchase price, inward freight, duties, taxes and any attributable cost of bringing the assets to its working condition for its intended use.

1.4 Foreign Currency Transactions

Company has determined its functional currency as Indian Rupee (INR).

Initial recognition

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement as at Balance Sheet Date

Foreign currency monetary items of the Company outstanding at the Balance Sheet date are restated at year end exchange rates.

Non-monetary items carried at historical cost are translated using the exchange rates at the dates of initial transactions.

Treatment of exchange differences

Exchange differences arising on settlement/restatement of foreign currency monetary assets and liabilities of the Company are recognised as income or expense in the Statement of Profit and Loss.

1.5 Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that takes a substantial period of time to get ready for its intended use are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Other borrowing costs are recognised as expenditure in the period in which they are incurred.

1.6 Financial Instruments

(a) Financial asset

(i) Initial recognition and measurement

At initial recognition, financial asset is measured at its fair value. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

(ii) Subsequent measurement

For purposes of subsequent measurement, financial assets are measured at amortised cost or fair value through profit or loss.

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method (EIR).

(iii) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

(b) Financial liabilities

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective interest rate method. Gains and losses are recognised in profit and loss when the liabilities are de-recognised as well as through the amortisation of effective interest.

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires.

1.7 Revenue Recognition

(A) Other Operating Income

(i) Interest Income

For all debt instruments measured at amortised cost, interest income is recognised on time proportion basis, taking into account the amount outstanding and effective interest rate.

1.8 Earnings per share

Basic/diluted earnings per share is calculated by dividing the net profit and loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares/diluted potential equity shares outstanding as at the end of the year, as the case may be.

1.9 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks, cash on hand and short-term deposits net of bank overdraft with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

1.10 Statement of Cash Flows

Cash flows are reported using indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from regular revenue generating (operating activities), investing and financing activities of the Company are segregated

1.11 Provisions and Contingent Liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) because of a past event, for which it is probable that a cash outflow will be required, and a reliable estimate can be made of the amount of the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, it's carrying amount is the present value of those cash flows (when the effect of time value of money is material). These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

1.12 Significant Accounting Judgments, Estimates and Assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

(i) Impairment of assets:

The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

(ii) Property Plant and Equipment

The Company depreciates property, plant and equipment on a straight line basis over estimated useful lives of the assets. The charge in respect of periodic depreciation is derived based on an estimate of an asset's expected useful life and the expected residual value at the end of its life. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology. The estimated useful life is reviewed at least annually.

27 Financial risk management - objectives and policies

The Company has a well-managed risk management framework, anchored to policies and procedures and internal financial controls aimed at ensuring early identification, evaluation and management of key financial risks (such as liquidity risk, market risk, credit risk and foreign currency risk) that may arise as a consequence of its business operations as well as its investing and financing activities.

Accordingly, the Company's risk management framework has the objective of ensuring that such risks are managed within acceptable risk parameters in a disciplined and consistent manner and in compliance with applicable regulation.

1) Liquidity risk

Liquidity risk is the risk that the Company will encounter due to difficulty in raising funds to meet commitments associated with financial instruments that are settled by delivering cash or another financial asset. The Company accesses local financial markets to meet its liquidity requirements. Management monitors rolling forecasts of the company's liquidity position and cash and cash equivalents on the basis of expected cash flows.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

Kitex Apparel Parks Limited

Notes forming part of the Financial Statements for the year ended March 31, 2025

2) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risks.

a) Foreign currency exchange rate risk

Since the Company has not commenced any operations and in the stage of setting up its manufacturing facility Company does not have any material foreign exchange payables or receivables. In all of the material cases capital goods are delivered on the basis of prepaid advances hence not effected by foreign currency exchange risk.

b) Interest Rate risk

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of the loans and borrowings effected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings as follows :

Particulars	As at	As at
	March 31, 2025	March 31, 2024
Variable rate instruments		
Financial liability - Term Loan from Banks	91,999.08	60,960.17

c) Credit risk

Credit risk refers to risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Since the company has not commenced operations this risk is not applicable

28 Capital management

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders. The primary objective of the Company's capital management is to maximize the shareholder value and to ensure the Company's ability to continue as a going concern.

The Company has not distributed any dividend to its shareholders. The Company monitors gearing ratio i.e. total debt in proportion to its overall financing structure, i.e. equity and debt. Total debt comprises of non-current borrowing from Banks. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Particulars	As at	As at
	March 31, 2025	March 31, 2024
Equity attributable to share holders	58,943.62	42,530.17

Less: Cash and cash equivalents	383.50	291.31

Total capital (equity + debt)	149,516.20	101,510.03
Net debt to capital ratio	0.61	0.58

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.
